

Evacuation evacuation chair h687_99

Evacuation chair h687_99 in aluminum, 14.2 kg, with tracks and telescopic handles. Load capacity 250 kg, foldable in 33x55x107 cm.

The **Evacuation evacuation chair h687_99** is an evacuation chair designed to transport people with reduced mobility in case of emergency, when elevators are not available or are out of service. Designed for rescue operators, healthcare personnel, and intervention teams, this device solves the criticality of transporting patients along flights of stairs, ensuring a smooth, fast, and safe evacuation for both the patient and the operator. The structure features a robust but lightweight frame in aluminum, PVC, PP, and PU with a weight of 14.2 kg and a maximum load capacity of 250 kg. For descending stairs, the chair uses two reinforced tracks that guarantee better control and smooth movement, combined with an ergonomic extendable control handle. For ascending stairs, the system integrates two telescopic and extractable front handles (an operation for which the presence of a third operator is recommended). The setup is completed by Ø 20 cm rear wheels to reduce friction on flat surfaces, Ø 10 cm swivel front wheels with brakes, an adjustable headrest equipped with a strap, a reinforced and adjustable seat in comfortable and easy-to-clean PVC, and a footrest. Clear graphic instructions are provided on the back of the headrest, and the chair complies with the European Medical Device Regulation (MDR).

Technical features

- **Materials:** aluminum, PVC, PP, and PU
- **Weight:** 14.2 kg
- **Maximum load capacity:** 250 kg
- **Dimensions when open:** 111/145 × 55 × 160 cm
- **Dimensions when closed:** 33 × 55 × 107 cm
- **Length with handles extracted:** 145 cm
- **Length with handles closed:** 111 cm
- **Width:** 55 cm
- **Height with backrest extended:** 160 cm
- **Height with backrest closed:** 107 cm
- **Tracks:** 2 reinforced tracks for smooth movement and control along stairs
- **Upper handle:** ergonomic and extendable for descending stairs
- **Front handles:** 2 telescopic and extractable handles for ascending stairs
- **Front wheels:** swivel Ø 10 cm with brake
- **Rear wheels:** Ø 20 cm to reduce friction on flat surfaces
- **Headrest:** adjustable and equipped with a strap

- **Seat:** reinforced and adjustable in PVC, easy to clean
- **Footrest:** integrated for stability and blood circulation support
- **Integrated instructions:** clear graphic instructions provided on the back of the headrest
- **Regulatory compliance:** complies with the European Medical Device Regulation (MDR)
