

Evacuation stair chair for disabled persons h568_07

Evacuation chair for transporting disabled or injured persons. Frame material: aluminum. Load capacity: 185 kg.

Evacuation chair suitable for evacuation and rescue operations. Ideal also for use by healthcare professionals and firefighters. Particularly suitable for **horizontal transport and use on stairs**, both uphill and downhill, thanks to the presence of an openable base equipped with swivel wheels and transport handles. Equipped with **footrests and armrests** to allow the transport of disabled persons as well. Furthermore, it features an **ergonomic backrest** and **padded headrest** complete with an immobilization strap. **Lightweight and easy to handle** thanks to the 2 height-adjustable maneuvering handles. It can be conveniently folded after use so as not to take up space.
