

Evacuation stair chair with tracks h687_97

Evacuation stair chair with tracks h687_97 in aluminum weighing 10 kg. Smooth movement on stairs, 250 kg capacity, foldable in 90x17.5x104 cm.

The **Evacuation stair chair with tracks h687_97** is a technical solution designed for the rapid and safe evacuation of people with mobility limitations in emergency situations, specifically when elevators cannot be used or are out of service. Developed to support rescue operators, healthcare personnel, and managers of public or private facilities, this device solves the operational criticality of vertical transport along flights of stairs, reducing the physical effort of rescuers and ensuring total control during descent. The system utilizes high-grip tracks that ensure smooth movement and is equipped with a handlebar extensible to multiple heights to optimize the grip. Despite a lightweight structure weighing only 10 kg made of aluminum, PVC, PP, and PU, the chair boasts a high load capacity of up to 250 kg and a space-saving foldable configuration. The setup includes 15 cm rear wheels for movement on flat surfaces, 10 cm swivel front wheels with brakes, an adjustable headrest with safety belts, a reinforced adjustable seat in washable PVC, and an integrated footrest. The presence of graphic instructions on the back of the headrest facilitates immediate use in compliance with European medical device regulations (MDR).

Technical characteristics

- **Construction materials:** Al (Aluminum), PVC, PP, PU
- **Overall weight:** 10 kg
- **Maximum load capacity:** 250 kg
- **Dimensions in use:** 90 cm (length) × 52 cm (width) × 154 cm (height)
- **Dimensions when folded:** 90 cm × 17.5 cm × 104 cm
- **Height with handle extended:** 154 cm
- **Height with handle retracted:** 104 cm
- **Descent system:** High-grip tracks for smooth movement on stairs
- **Grip:** Extensible handlebar adjustable to multiple heights
- **Front wheels:** Swivel with diameter Ø 10 cm and equipped with brake
- **Rear wheels:** Diameter Ø 15 cm for friction reduction on flat paths
- **Patient supports:** Adjustable headrest with safety belts, reinforced adjustable seat in washable PVC, and stability footrest
- **Visual assistance:** Graphic instructions printed on the back of the headrest
- **Regulatory compliance:** Complies with European medical device regulation (MDR)
