

Evaporative cooler 100 L h923_08

Portable evaporative cooler h923_08 with 100 L tank. Air capacity 7,100 m³/h, power 245 W, UV lamp, and three speeds. Ideal for outdoor and indoor use.

The **100 L h923_08 evaporative cooler** is a portable device from the EVC range that cools the air using the natural principle of water evaporation. Designed for **logistics operators, workplace data management staff, home security personnel, office technicians, and managers of industrial and commercial activities**, this system meets the climate control needs of large volumes in an ecological and economical way. The module solves the operational problem of **cooling and purifying the air in outdoor environments and indoor spaces that cannot be enclosed by a door, ensuring the flow of fresh air and handling the flow of smoke, odors, and heat generated by the operation of the equipment**. The system ensures that water leaves the tray and is warm, without dissipating heat during discharge. The appliance integrates a bactericidal UV lamp on the internal surface for water sanitization, a large 100-liter tank, and easily removable and washable cellulose evaporative panels; the entire housing is made of UV-resistant and corrosion-resistant fabric. Thanks to the plug-and-play system with a Schuko connector, installation takes only a few minutes and the unit is quickly set up.

Technical features

- **Model/Type:** portable evaporative cooler (EVC range)
- **Reference code:** h923_08
- **Volumetric air flow rate:** 7,100 m³/h
- **Integrated water sanitization:** bactericidal UV lamp (YES)
- **Rated electrical supply:** 230 V / 1 phase / 50 Hz
- **Connection type:** SCHUKO (plug and play configuration)
- **Variable motor power:** 245 W
- **Ventilation adjustment:** 3 fan speeds
- **Internal container capacity:** 100 L
- **Continuous water supply:** direct water connection (YES) via hose with automatic filling
- **Water monitoring:** water flow control (YES)
- **Structural dimensions (W x D x H):** 695 x 510 x 1405 mm
- **Net structural mass (weight):** 20 kg
- **User interface:** analog control panel
- **Outer fabric features:** UV-resistant and corrosion-resistant for maximum durability and sustainability.
- **Internal evaporative components:** cellulose panels, easily removable and washable
- **Air filtration system:** washable air filter
- **Pump safety device:** automatic water protection device to protect the water pump
- **Electrical switching system:** automatic switching in case of power failure
- **Energy efficiency:** high flow capacity with extremely low and economical energy consumption
