

Exercise mat in expanded polyurethane h. 5 cm h581_59

Gymnastics mat in integral skin polyurethane, 200x100x5 cm. Open-cell structure for high shock absorption and breathability. This **professional gymnastics mat** is designed for high-traffic contexts such as gyms and rehabilitation centers. Made of **integral skin expanded polyurethane**, the mat employs a formulation free of HFCs or CFCs, using zero ODP (Ozone Depletion Potential) blowing agents for a reduced environmental impact. The **open-cell configuration** ensures optimal elastic response and constant breathability, preventing the accumulation of heat and moisture during intensive use.

The upper and lower surface is equipped with a special coating that increases its **mechanical resistance**, protecting the internal core from abrasions, cuts, and repeated stresses typical of physical therapy and functional training.

Technical features

- **Dimensions:** L. 200 x W. 100 x h. 5 cm
- **Density:** PK 20
- **Material:** Integral skin polyurethane formulation (HFC/CFC free)
- **Internal structure:** Fully open-cell for shock absorption
- **Sustainability:** Blowing agents with Ozone Depletion Potential (ODP)
- **Color:** Blue
