

Expandable safety barrier h972_04

Expandable steel barrier up to 4 meters, ideal for delimiting hazardous areas. Dimensions: L 400 × D 45 × H 100 cm.

The **H972_04 expandable safety barrier** is an effective solution for **quickly delimiting work zones, hazardous areas, and restricted passages**, helping to prevent accidents and ensure safety in industrial environments, construction sites, and public spaces.

Made of **epoxy-coated steel**, it is designed to resist **wear, weather agents, and UV rays**, making it suitable for both **indoor and outdoor** use. The **accordion system** allows it to extend up to **4 meters**, adapting it to various needs.

When not in use, it can be **compactly folded**, reducing its footprint and facilitating transport and storage. The **elegant and professional black design** ensures clear and discreet signaling, particularly indicated for industrial and logistics environments.

Protect and delimit areas with the **H972_04 expandable barrier**! Safe, resistant, and easy to store. **Buy now or request a personalized quote.**

Technical features:

- **Material:** Weather-resistant epoxy-coated steel
- **Color:** Black
- **Maximum extended length:** 4 meters
- **Closing system:** Foldable to reduce footprint
- **Weight:** 17.90 kg
- **Dimensions:** L 400 × D 45 × H 100 cm

User benefits:

- **Safe and immediate delimitation:** Ideal for preventing access to risk zones.
- **Robust structure:** Coated steel resistant to wear and weather agents.
- **Easy to store:** Compact closure for minimum footprint.
- **Versatility of use:** Perfect for construction sites, warehouses, parking lots, and industries.
- **Professional design:** Black color for a discreet and elegant appearance.

FAQ:

1. **Is the barrier suitable for outdoor use?**
Yes, the epoxy coating protects it from weather agents, making it suitable for both indoors and outdoors.
2. **Can the length be adjusted?**
Yes, the expandable structure allows for adjustment up to 4 meters according to needs.
3. **How much space does it take up when closed?**
The barrier is foldable, significantly reducing its footprint for easy transport and storage.
4. **Can it be fixed to the ground?**
No, but the weight of 17.90 kg ensures stability in multiple use situations.
5. **What are the recommended applications?**
It is ideal for delimiting aisles, work areas, entrances, and danger zones in industrial environments, construction sites, and warehouses.

Mini buying guide:

If you are looking for a **durable, space-saving, and extensible safety barrier**, the **H972_04** is the ideal solution. Perfect for **industrial environments, construction sites, warehouses, and public spaces**, thanks to its **steel structure, epoxy finish, and compact design**, it offers **protection and practicality** in every context.

Easy to **transport and store**, this barrier is perfect for those who need a **safe but temporary delimitation**, with a **maximum**

extension of 4 meters.
