## Expired drug collection container h32601

Expired medicine collection container in rotational polyethylene with white anti-intrusion lid. Capacity: 105 lt. Height from ground: about 95 cm.

Container **for the collection of expired drugs** with a unique and innovative design ideal for hospitals, clinics, pharmacies and nursing homes. Robust structure **made of polyethylene using the rotational technique**; this material, molded in this way, guarantees great resistance to impacts, aging, and discoloration.

The lid is locked to the container by a **triangle lock** and access for drugs is via an **anti-intrusion door**.

### Technical features:

- Material: rotational polyethylene
- Lid locked via triangle lock
- Without base
- Capacity: 105 liters
- Height from ground: 95 cm
- Lid size: about 48 cm
- Anti-intrusion door dimensions: 19x19xh.20 cm
- Depth: 56 cm
- Weight: about 6.5 Kg
