Expired medicine collection bin h140_303

Expired medicine collection bin to be placed near pharmacies. Fixing: to be buried. Capacity: approximately 70 liters.

Expired medicine collection container ideal for placement near pharmacies and doctors' surgeries. **Circular-shaped** expired medicine container made of galvanized sheet metal complete with a sign indicating the type of waste. Waste disposal is performed by **lifting (opening) the flap**; a special system prevents the retrieval of medicines once they have been placed in the bin. Ground fixing is achieved **by extending the support post** into the ground.
