

Expired medicine collection container h33201

Galvanized steel container specifically designed for the collection of expired medicines. Capacity: 100 liters. Italian product. Dimensions: W.54.5 x D.51 x h.103.5 cm.

Container **for the collection of expired medicines and drugs** ideal for placement both indoors and outdoors in public premises. Expired medicines contain chemical substances that are harmful and polluting, which is why it is necessary to separate them from other waste; therefore, it is recommended to use specific containers located in pharmacies or other affiliated points. Special waste collection container made of **galvanized steel** equipped with a special inlet for inserting drugs designed to prevent the removal of the material introduced. Emptying takes place via a **side door** for easy bag extraction.

Technical features:

- Material: galvanized steel coated with a double layer of paint
- Safety top opening with "hopper" design
- Internal steel bag-holder frame
- Equipped with a key lock for locking the door
- Dimensions: W.545 x D.510 x h.1035 mm
- Capacity: 100 liters
- CE certified product
- 100% Made in Italy
