

Extensible boundary barrier h972_02

Expandable barrier up to 2.4 meters, ideal for delimiting and securing areas. Dimensions: L 240 x H 100 cm.

The **H972_02 extensible boundary barrier** is a practical and resistant solution for **quickly signaling danger zones, work in progress, or prohibited areas** in industrial, public, and commercial environments. **Made of lightweight yet robust polypropylene**, it is easy to transport thanks to the **integrated handle** and can be **stored without clutter**.

This barrier offers **high stability**, thanks to the possibility of **filling the posts with 5 liters of water on each side**, ensuring greater resistance to wind and impacts. For **excellent visibility even at night**, it is equipped with **reflective strips**, while the **open/closed locking system** ensures secure fastening when in use.

The **expandable length up to 2.4 meters** allows it to be adapted to different needs, making it perfect for **construction sites, warehouses, parking lots, public events, and industries**.

Protect and delimit areas with the **H972_02 extensible barrier**! Safe, stable, and easy to transport. **Buy now or request a personalized quote**.

Technical characteristics:

- **Material:** Resistant polypropylene
- **Color:** Red with reflective strips
- **Maximum extended length:** 2.4 meters
- **Stability:** Posts fillable with 5 liters of water per side
- **Safety system:** Open/closed locking
- **Transport handle:** For simple movement
- **Dimensions:** L 240 x H 100 cm
- **Weight:** 6.40 kg

User benefits:

- **Immediate safety:** Ideal for quickly delimiting danger zones or work in progress.
- **Easy to transport:** Integrated handle for quick movement.
- **High stability:** Posts fillable with water to resist wind and impacts.
- **Optimal visibility:** Reflective strips for nighttime signaling.
- **Versatility of use:** Perfect for construction sites, warehouses, parking lots, and events.

FAQ:

1. **Can the length of the barrier be adjusted?**
Yes, it is expandable up to 2.4 meters, adapting to different needs.
2. **How are the posts filled to increase stability?**
Each post can be filled with 5 liters of water on each side.
3. **Is the barrier visible even at night?**
Yes, thanks to the reflective strips, it ensures optimal visibility in low light conditions.
4. **Can it be closed and stored easily?**
Yes, it has a compact structure and a transport handle for easy storage.

Mini purchasing guide:

If you need a **safe, stable, and visible expandable barrier**, the **H972_02** is the ideal solution. Perfect for **indoor and outdoor**

use, thanks to its **resistant polypropylene** structure, it offers **maximum stability with fillable posts and excellent visibility thanks to reflective strips**.

Thanks to the **integrated handle**, it is **easy to transport**, while the **open/closed locking system** guarantees **additional safety**. Perfect for **companies, construction sites, events, warehouses, and parking areas**.
