

Extensible funeral trolley h687_88

Extensible and foldable funeral trolley in aluminum and stainless steel. Load capacity 300 kg, 20 cm wheels and folded thickness of only 13 cm. Made in Italy.

The **h687_88 extensible funeral trolley** is a professional Made in Italy device, designed for the support and transport of coffins with the perfect balance between solidity and maneuverability. Characterized by an **aluminum frame** that guarantees lightness and by critical components such as joints and handles in **stainless steel**, this support ensures superior resistance to wear and oxidation. Designed to solve space issues in transport vehicles and warehouses, the trolley folds down to a **thickness of only 13 cm**. The opening and closing system is managed by lubricated nylon and teflon bushings, which make every operation smooth, precise and silent, respecting the decorum required by funeral agencies and cemetery services.
