

Extinguishing cigarettes in steel h10981

Ashtray made of galvanized steel available in floor or wall. Italian product.

Ashtray made of galvanized steel available in floor or wall. Italian product.

Turn it off cigarettes is constituted by a structure intubolare steel 150x150 mm 1300 mm high. Frontally on the tubular is formed an opening in which is inserted a grid perforated plate that serves as a floor switch off cigarettes.

Inside the tube is a box-like container with extraction in the back by unlocking a lock with universal key that allows you to remove a flap.

The tubular column is closed on the top with a cap welded sheet metal and the base is constituted by a square plate 200x200 sp.8mm that can be fixed to the ground by anchors. All metal parts are galvanized according to UNI and polyester powder polyester thermosets.

Specifications:

- height 130 cm
- width 15 cm
- depth 15 cm
- weight 18 kg
