

## Extreme emergency backpack h655\_38

Professional first response backpack in resistant material, dimensions 365x235x520 mm, 25 kg capacity and protective anti-wear rails.

The **first response backpack** is a transport device designed to ensure maximum efficiency and protection of medical material in emergency contexts. The structure is made of **high-resistance material**, designed to withstand intense mechanical stress. The design integrates specific solutions for technical rescue, such as **protective rails** and reinforced handles, making it an indispensable tool for operators who require reliability in hostile environments or during vertical handling operations.

## Technical characteristics

- **Type:** Emergency and first aid backpack
- **Maximum load capacity:** 25 kg
- **External protection:** Smooth rails positioned on 3 sides for wear prevention
- **Closing system:** High-smoothness rust-proof zipper
- **Dimensions:** 365 x 235 x 520 mm
- **Handling:** Extra reinforced handles for lowering and lifting operations
