

Fast food tray emptying bin h20_123

Satin stainless steel tray-emptying bin 50L, swinging flap, reversible door with triangular lock, adjustable feet. Fast food and catering.

The tray-emptying bin is an equipment specifically designed for fast food environments, pizzerias, shopping centers, restaurants, and rotisseries. It allows for the easy emptying of dirty trays while maintaining a hygienic and practical organization of the waste disposal area. The robust structure in **satin stainless steel** guarantees corrosion resistance and ease of cleaning, essential characteristics in contexts with high humidity and frequent sanitization.
