

Fast food tray trolley h09191

Professional double-column tray trolley entirely made of **stainless steel**. Capacity **20 trays**, robust structure with coordinated side panels and a distance between levels of 12 cm. The ultimate solution for high-traffic canteens, catering, and self-service.

The **double-column tray trolley** represents excellence in terms of robustness and hygiene for the collective catering sector. Designed to withstand the intense rhythms of canteens, fast-food outlets, and large buffet halls, this model stands out for its structure entirely made of **stainless steel**, including the side panels. This construction choice not only guarantees superior longevity but also ensures ease of total sanitization, fundamental in professional environments.

The trolley is organized into two side-by-side columns for a total capacity of **20 trays**. The space between the rails is **12 cm**, a measurement designed to allow the easy housing of trays complete with plates, glasses, and cutlery without obstruction. The stainless steel side panels act as a protective and hygienic barrier, giving the trolley a clean technical design that integrates perfectly into modern kitchens and dining rooms.

Technical features

- **Structure material:** Professional Stainless Steel
- **Side panels:** Stainless Steel (greater resistance and hygiene)
- **Capacity:** 20 Trays (10+10 configuration)
- **Distance between rails:** 120 mm (optimized useful space)
- **Total dimensions:** W 74 x D 62 x H 175 cm
- **Handling:** High-capacity multi-directional wheels
- **Configuration:** Double column for maximum efficiency in compact spaces

** Trays not included. Product compliant with international food safety regulations.*
