

Fast food tray trolley h220_395

Professional tray trolley in **stainless steel** with **10 GN 1/1 slots** capacity. Slim vertical design (H 184 cm), equipped with wheels with brake and a practical **top work surface** for the safe transport of pitchers and bottles. Ideal for canteens, bakeries and catering.

The **stainless steel tray transport trolley** is a versatile piece of equipment designed to optimize logistics in professional environments such as industrial kitchens, bakeries and fast-food outlets. Thanks to its single-column structure with high vertical development, it allows for the management of a significant volume of trays while occupying an extremely small floor area.

Made entirely of **stainless steel**, the trolley guarantees hygiene and durability over time. In addition to the 10 levels dedicated to **GN 1/1 trays**, this model stands out for the presence of a **top work surface with a safety lock**, ideal for the stable transport of pitchers, glasses and bottles. Maneuverability is ensured by four wheels, two of which are equipped with brakes to guarantee maximum stability during loading or stationary phases.

Technical features
