

Fast food tray trolley h684_06

Professional tray trolley in **AISI 304 stainless steel** with **12-slot** capacity. Equipped with robust **chrome-plated steel wire guides** and 125 mm oversized wheels, it is the ideal solution for canteens, highway service areas, and fast-food outlets. Essential design, highly hygienic, and customizable with optional paneling.

The **AISI 304 stainless steel tray transport trolley** is professional equipment designed to withstand the intense pace of highway service areas, fast-food outlets, and snack bars. The structure, made of high-quality steel, guarantees total resistance to corrosion and impeccable ease of sanitation, perfectly meeting HACCP requirements.

The trolley is equipped with **12 chrome-plated steel wire guides**, a technical choice that facilitates tray insertion and reduces dirt accumulation compared to sheet metal guides. Maneuverability is excellent thanks to 4 swivel wheels of 12.5 cm, protected by **non-marking bumpers** that safeguard walls and furniture. A strong point is modularity: upon request, it is possible to add side and rear panels in **HPL** to transform the trolley into a closed station, more discreet and aesthetically finished.
