

Fiberglass reinforced polyester planter h990_03

Glossy FRP planter with UV protection, lightweight and weather-resistant. Dimensions: L 120 x D 60 x H 40 cm.

The **FRP planter for public spaces H990_03** is an urban furniture element of **high-quality craftsmanship**, designed to enhance **public spaces, green areas, terraces, pedestrian walkways, commercial entrances, and gardens** with elegance and functionality. Made of **FRP (fiberglass reinforced polyester)**, it represents the perfect combination of **modern design, durability, and practicality**.

The **glossy outer coating** is treated with **UV protection**, ensuring long-lasting durability even when exposed to full sun. The material is **waterproof, anti-corrosive, and non-deformable**, perfect for resisting atmospheric agents in any season. The **fiberglass reinforcement** ensures **significant structural strength** while maintaining a low weight, thus allowing for easy movement and installation.

With a size of **120 x 60 x H 40 cm**, this planter is ideal for **linear green arrangements, borders, and divisions of pedestrian spaces or relaxation areas**. It is particularly suitable for **public contexts** with high pedestrian traffic, where **durable and low-maintenance products** are required.

The surface is easy to clean and requires no additional treatments. Available in **different colors**, it can be customized to integrate perfectly into the surrounding environment or to create **high-impact color contrasts**.

Choose this **FRP planter for public spaces H990_03**, durable and with a refined design to enhance every outdoor space. Contact us for a personalized offer or to discover all available colors!

Technical characteristics:

- **Perfect:** for public and commercial spaces with high footfall.
- **Ease:** of installation and management, without maintenance interventions.
- **Customizable:** in colors to integrate with any architectural context.

FAQ:

1. **Does the material resist frost and rain?**
Yes, FRP is waterproof and designed to withstand all weather conditions.
2. **Is it possible to use it as a divider in urban spaces?**
Absolutely yes. Thanks to its length, it is perfect for delimiting areas or pathways.
3. **Can I choose a specific color?**
Yes, the planter is available in a range of RAL colors.

4. Is it suitable for large plants or shrubs?

Yes, the reinforced structure makes it stable even with soil and voluminous vegetation.

5. Is it difficult to clean?

No, the surface is smooth and washable with simple water or neutral detergents.

Mini buying guide:

Planters intended for urban furniture must be **aesthetically refined but also extremely functional**. FRP represents an excellent choice because it is **resistant, lightweight, and totally waterproof**, suitable for every climatic condition.

Models like the H990_03, with **substantial dimensions but easy to manage**, are ideal for creating **green barriers, pathways, or simple decorative points**.

Always check the measurements, compatibility with the environment, and the possibility of **customizing the color** to harmonize the intervention with the existing architectural style.

FRP planter 120x60 for urban furniture, outdoor fiberglass planter, large UV-resistant plant container, modern planter for terraces and gardens, waterproof planter for public spaces, customizable design FRP planter.
