## Fire extinguisher stand h729\_37

Stand for 9 kg fire extinguisher, with protection against accidental impacts. Dimensions: W 40 x D 40 x H 82 cm. Weight: 13 kg.

The **H729\_37 fire extinguisher stand** is a solution designed to ensure maximum safety and protection of fire extinguishers in industrial, logistical, and commercial environments. Its elevated structure allows the **9 kg** extinguisher to be placed in strategic positions, such as at the end of shelving or in transit areas, protecting it from potential accidental impacts caused by operating vehicles such as **forklifts, pallet jacks**, or other equipment.

The robust and functional design is made of **red painted steel tube**, a material resistant to impacts and easily identifiable thanks to its bright color, which improves visibility even in high-traffic environments. The presence of the **Ø 27.3 mm steel protective tube**, with a thickness of 4 mm, cut in half, ensures additional protection for the extinguisher, making it less vulnerable to external damage. This element wraps around the extinguisher without compromising its accessibility in case of emergency.

The **compact dimensions of 40 x 40 x 82 cm** and the weight of **13 kg** guarantee a stable and well-anchored structure to the floor, without occupying excessive space, making it perfect even for warehouses or narrow corridors. The stand integrates easily into any environment, adding a touch of order and protection to operational spaces.

The **H729\_37** represents a smart investment for those who want a professional and durable solution, capable of combining functionality, resistance, and visibility. It is designed for high-movement environments, where protection and readiness in using fire extinguishers are essential to ensure safety and regulatory compliance.

Protect your fire extinguishers and keep your spaces in line with safety regulations with the **H729\_37** fire extinguisher stand. Robust and functional, it is the ideal solution for industrial and logistical environments. **Buy it now** and choose to add optional signage for a complete and professional system. **Contact us** for discounts on multiple orders and custom configurations!

### Technical features:

- **Capacity:** Suitable for fire extinguishers up to 9 kg
- **Function:** Elevated positioning to protect the extinguisher from accidental impacts
- **Materials:** Red painted steel tube, Ø 27.3 mm steel protective tube, 4 mm thickness, cut in half
- **Dimensions:** W 40 x D 40 x H 82 cm
- **Weight:** 13 kg

### User benefits:

- **Protection:** Prevents damage to the extinguisher caused by forklifts, pallet jacks, and other vehicles.
- **Visibility:** Red color.
- **Durability:** Made of robust steel with resistant painting.
- **Versatility:** Suitable for industrial environments, warehouses, and high-traffic areas.
- **Ease of use:** Stable design and compact dimensions for easy installation.

## FAQ:

1. **What is the capacity of the stand?**

The stand is designed to accommodate a fire extinguisher up to 9 kg.

2. **How does it protect the extinguisher from damage?**

The elevated structure and the steel protective tube protect the extinguisher from accidental impacts, typical in industrial or logistical environments.

3. **Is signage included?**

Signage is not included.

4. **What color is the tube?**

The steel tube is red.

5. **What are its dimensions?**

Its dimensions are W 40 x D 40 x H 82 cm, space-saving.

## Mini buying guide:

When choosing a fire extinguisher stand, it is important to evaluate some fundamental aspects to ensure safety, functionality, and durability over time. First, ensure the support is suitable for the type of environment where it will be used. The **H729\_37** is ideal for industrial spaces, warehouses, and high-traffic areas, thanks to its robust design that protects the extinguisher from accidental impacts with forklifts or pallet jacks.

The **resistance of materials** is another key factor: a steel structure like that of the H729\_37, with a 4 mm thick protective tube, guarantees protection not only against impacts but also against daily wear and stress. Furthermore, check that the painting is resistant and clearly visible, to facilitate the identification of the extinguisher even in difficult operating conditions.

Finally, consider the **dimensions and stability** of the support. With a 40 x 40 cm base and a weight of 13 kg, the H729\_37 offers a perfect balance between compactness and robustness, making it suitable for narrow corridors and operational corners, without compromising the protection of the extinguisher. This model is a practical and long-lasting solution, perfect for keeping environments safe and compliant with regulations.
