

Fire-resistant pedal bin h2082

Mobile stainless steel pedal container, 70 liters, steel pedal and handle, rubber wheels Ø95 mm, CNPP self-extinguishing certificate.

Mobile pedal container designed for healthcare environments, hotels, laboratories, and community facilities where hygiene and mobility are fundamental requirements. The structure, entirely made of **bright stainless steel** with a **stainless steel pedal and handle**, guarantees robustness, durability over time, and ease of sanitization. The **95 mm rubber wheels** allow for easy movement even on uneven floors.

The product solves the need for waste management in high-traffic environments while maintaining high hygiene standards and ensuring compliance with fire safety regulations.

Technical characteristics

- Structure and lid in bright stainless steel
- Stainless steel pedal and handle
- Integrated bag-holding elastic
- 95 mm diameter rubber wheels
- Body without openings to prevent fire propagation
- Capacity: 70 liters
- Dimensions: W. 48 × D. 42 × H. 75.5 cm
