

First aid backpack h13_313

First aid backpack in 600D polyester and water-repellent PVC, 40x25x47 cm. Modular system with 6 colored pouches for critical emergency interventions.

The **H13_313 first aid backpack** represents a professional solution for healthcare workers, paramedics, and rescue teams operating in dynamic contexts. Designed to withstand intense stress, it combines a **600D water-repellent polyester** outer shell with an internal **PVC tarpaulin** lining, ensuring the integrity of medical devices even in adverse weather conditions or hostile environments.

The internal architecture is optimized for maximum operational efficiency: the main space is divided by a **central zippered divider** and includes **6 removable colored pouches**. Each pouch is equipped with a transparent window and Velcro fastening, allowing for logical categorization of material and immediate access during critical rescue phases. The storage system is completed by elastic loops and strategically placed external pockets for frequently used tools.

Technical features

- **Outer material:** 600D Polyester with protective PVC tarpaulin coating
- **Properties:** Water-repellent and resistant to mechanical wear
- **Dimensions:** W 40 x D 25 x H 47 cm
