

First aid bag with trolley h13_312

Professional emergency bag with integrated trolley, 56x32.5x49 cm. Adjustable modular compartments and waterproof bottom for maximum mobility in rescue operations.

The **emergency bag with trolley H13_312** is an advanced solution for the logistical management of medical devices in critical scenarios. Designed specifically for **rescue professionals**, paramedics, and first responders, this bag solves the challenges associated with transporting heavy and bulky equipment, while ensuring impeccable internal organization.

The transport system based on a **trolley with an extendable handle** and high-resistance wheels allows for easy movement of medical supplies, reducing the operator's muscle fatigue during travel over long distances or flat surfaces. The internal structure features **adjustable compartments** that allow the space to be configured based on specific intervention protocols, ensuring that every instrument is stored securely and accessibly.

Technical features

- **External dimensions:** L 56 x D 32.5 x H 49 cm
- **Transport system:** Integrated trolley with extendable handle and reinforced wheels
- **Internal organization:** Modular compartments adjustable via movable dividers
- **Accessories included:** Detachable internal pouch with transparent window for quick identification
- **External storage:** Large perimeter pockets for frequently used consumables
- **Visibility:** Double yellow high-reflectivity reflective strips
- **Base protection:** Waterproof rubber bottom for insulation from moisture and liquids
