

## Fixed height steel Bobath couch h725\_24

Fixed height (50 cm) Bobath therapy table in painted steel. 200x100 cm surface, ideal for intensive neurological rehabilitation. The **h725\_24 couch** is a professional station specifically designed for **Bobath therapy** and neurological rehabilitation. Thanks to its **50 cm fixed height** configuration, it offers superior stability, essential for performing complex therapeutic maneuvers that require a firm and secure support base. The design promotes interaction between therapist and patient, ensuring the necessary space for assisted exercises and mobilization techniques.

Robustness is guaranteed by a **high-resistance painted steel structure**, capable of supporting a safe working load of up to 200 kg. The lower section of the frame is designed to allow the **easy passage of mobile patient lifters**, facilitating the transfer of non-self-sufficient users. The upholstery and padding are made of certified **class IM1 fire-retardant** materials, meeting the strictest safety standards for healthcare and hospital environments.

## Technical features
