

Flat cast iron gully grate h638_29

Flat road gully grate in ductile iron with automatic locking. External dimensions: 300 x 300 mm. Height: 45 mm.

The flat ductile iron gully grate is an indispensable urban furnishing element to ensure the safety of citizens and to correctly drain rainwater from the road to the sewage systems. The product features a **square frame** at both the supporting base and the top corresponding to the road level, complete with an **external perimeter flange, reinforcement ribs, shaped lugs** on the inner edge for locking the grate's closing system, and **internal tabs** at the four corners for housing an optional siphon.

The square grate is also equipped with parallel slots, a locking system, holes for articulation to the frame, a pair of nuts and bolts for the grate's articulation to the frame and anti-slip textures.

Technical features:

- Material: cast iron
- External dimensions: 300 X 300 mm
- Clear opening: 200 X 200 mm
- Height: 45 mm
- Drainage area: 2.19 dm²
- Weight: 6 kg
- Anti-theft locking
- Hinge
- Automatic locking
- Siphonable
- Compliant with DPR 503/96
