

Flat road gully h638_33

Flat road gully with anti-theft locking. External dimensions: 900 x 900 mm. Height: 80 mm.

The road gully is a fundamental urban furniture element to ensure **proper rainwater collection**, preventing it from accumulating on the road surface. At the same time, the product represents a **safety device** aimed at preventing cars and pedestrians from suffering damage due to uneven road surfaces. The product features a **ductile iron structure built to UNI EN 124 standards** and consists of a **square-shaped frame** at both the seating base and the top corresponding to the road surface level, and a square grate.

The frame is equipped with:

- Continuous external perimeter flange on all four sides
- Reinforcement ribs
- Shaped lugs on the inner edge to lock the grate closing system
- Holes for the grate articulation
- Internal lugs prepared at the four corners for housing an optional siphon

The grate is equipped with:

- Parallel slots
- Closing system, unlockable with a generic lever
- Holes for articulation to the frame
- Pair of nuts and bolts inserted to prevent theft and tampering
- Anti-slip surface

Technical features:

- Material: ductile iron UNI EN 124
- Siphonable
- Anti-theft locking
- Automatic closing
- Hinge
- External dimensions: 900 x 900 mm
- Clear opening: 800 x 800 mm
- Height: 80 mm
- Waterway area dm2: 27.43

INFORMATION

- Length in millimetres 900.000000
- Depth in millimetres 900.000000
- Height in millimetres 80.000000
