Flat rubber protection with aluminum profile h972_53

"Flat rubber corner protection with aluminum profile. L. 1140 x D. 50 x h. 50 mm. High visibility and resistance.

The **h972_53 flat rubber corner protection with aluminum profile** is designed to offer a resistant, visible, and functional barrier against accidental impacts in industrial, logistical, or commercial environments. Ideal for protecting sharp edges, columns, or exposed corner structures, it combines a **shockproof rubber** core with a sturdy **aluminum** profile for greater durability and reinforced structural protection.

The **high-visibility black and yellow strip** improves visual safety in high-traffic areas, such as warehouses, covered parking lots, technical corridors, and loading/unloading areas. The dimensions of **1140 mm in length** with a **50 x 50 mm** section provide wide corner coverage, while the **Ø 4 mm fixing holes** allow for precise mounting on flat surfaces.

Thanks to the **combination of cushioning rubber and aluminum structure**, it effectively absorbs impacts without deforming, keeping the protection intact even under intensive use conditions.

Perfect for those looking for a durable, highly visible, and easy-to-install solution for **high-security indoor environments**.

Protect corners and reduce the risk of damage and injury! Order the h972_53 corner protection now on Holity.com or request a quote for multiple supplies.

Technical features:

- **Main material:** Rubber
- **Secondary material:** Aluminum
- **Color:** Black/Yellow (high visibility)
- **Length:** 1140 mm
- **Width: 50 mm**
- **Height: 50 mm**
- **Fixing holes:** Ø 4 mm
- **Weight:** 2.20 kg
- **Fixing:** Screws or plugs (not included)
- **Application:** Indoor, on walls, pillars, corners, industrial structures

User benefits:

- **High visibility:** improves safety at critical points.
- **Robustness:** the aluminum profile ensures durability and resistance.
- **Effective protection:** prevents damage from accidental impacts.
- **Simple assembly:** already prepared with holes for fixing.
- **Ideal for indoor spaces:** in industrial and technical environments.

FAQ:

1. Where can this protection be installed?
It is ideal for installation on columns, edges, shelving, or exposed walls in indoor environments.

2. Is the fixing included in the package?
No, screws and plugs are not included but are compatible with the 4 mm pre-drilled holes.

3. Can I mount it in outdoor environments?

It is not recommended for continuous outdoor use: it is designed for use in covered or indoor environments where it is not exposed to the elements.

4. Is the aluminum profile exposed or coated?
It is an integral part of the structure to provide greater stability and durability to the protection.

5. What dimensions does the protection cover?
The protection measures 1140 mm in length with a 50 x 50 mm section, suitable for standard corners.

Mini buying guide:

Choosing an **industrial corner protection** means investing in the safety and durability of infrastructure in areas at risk of impact. The **h972_53 rubber corner protection with aluminum profile** represents one of the most reliable solutions for those who wish to **prevent structural damage** caused by impacts with forklifts, lift trucks, or other moving vehicles within **warehouses**, **logistical areas**, or **production plants**.

Thanks to the **reinforced aluminum structure**, this model offers extra protection compared to traditional rubber corner guards and absorbs impact energy, minimizing the risk of damage. The highly flexible **rubber foam** cushions the impact, while the two-tone **yellow and black** finish improves visibility and visual prevention in poorly lit or high-traffic environments.

It is the ideal choice for those looking for a **resistant, durable, and visually effective solution** without sacrificing ease of installation. Corner protections like the h972_53 are indeed **pre-drilled** and can be easily fixed to the corners of walls, columns, or machinery, ensuring continuous defense and long-lasting durability.

Be sure to check the **dimensions of the area to be protected** and choose the most suitable length and section based on your facility's needs.

With the h972_53 protection, you protect not only structures but also people, improving workplace safety in a simple and concrete way.

Rubber corner protection, industrial corner guards, aluminum corner protection, black yellow shockproof corner, protective profile for edges, warehouse column protection, rubber aluminum bumper, industrial corner safety.
