

Flip-top table h908_104

Multipurpose table with flip-top, metal structure with feet. Dimensions: W 160 x D 80 x H 75 cm.

The **flip-top meeting table h908_104** represents an innovative and practical solution for optimizing space in professional environments. With a **160 x 80 cm top**, this table offers a large workspace that can be used for meetings, workshops, and conferences. Its **sturdy metal structure** ensures stability and durability over time, even with frequent use. One of the most appreciated features is the **flip-top mechanism**, which allows the top to be closed and the tables to be nested horizontally, saving precious space when not in use. This function is particularly useful in dynamic environments where the furniture layout often changes, such as multifunctional meeting rooms and classrooms.

The **integrated wheels** allow for easy movement, making the reorganization of spaces quick and effortless. Furthermore, the wheels ensure that the table remains firmly in position during use. The surface of the top is made of an impact-resistant and easy-to-clean material, ideal for maintaining a professional appearance over time. The combination of **functionality, ease of movement** and sturdiness makes this table the perfect choice for companies, educational institutions and facilities that need versatile and flexible solutions for space management.

Choose flexibility and efficiency with our **flip-top meeting table h908_104**. Ideal for transforming your spaces into multipurpose environments. **Order today** and optimize the management of your meeting rooms or contact us for a personalized quote!

FAQ:

- 1. Is the table easy to open and close?**
Yes, the flip-top closing system is intuitive and allows you to open and close the top quickly, facilitating effortless space management.
- 2. Is it equipped with wheels?**
Yes, the table has a tilted folding on wheels, horizontally nestable.
- 3. What is the material of the top?**
The top is made of impact-resistant and easy-to-clean material, ideal for ensuring long durability and a consistently professional appearance.
- 4. Is the table available in other sizes or colors?**
The standard dimensions are 160x80 cm, but variants may be available on request. Contact the dealer for information on customized options.
- 5. Is the table suitable for intensive use?**
Yes, thanks to the sturdy metal structure and the resistant top, the table is perfect for frequent use in professional environments.

Mini buying guide:

When choosing a **flip-top table**, it is important to consider the space available in your room and the intended use. If the room needs to be frequently reorganized, favor tables with an easy-to-use closing system and high-quality wheels to facilitate movement. Ensure that the table is built with a **sturdy metal structure** to guarantee stability and durability, especially in high-intensity environments. A resistant top not only offers a safe work surface but also simplifies maintenance, keeping a professional look. Also consider the height and ergonomics of the table to ensure comfort during long work sessions or meetings.
