

## Floating pool divider 30 m h1009\_13

30 m floating divider h1009\_13 for FINA pool with Ø120 mm PP discs and Ø 6 mm AISI316 stainless steel rope. For competitions and training.

The **Floating pool divider 30 m h1009\_13** is a technical element for 30-meter swimming facilities, designed and produced in compliance with FINA facility rules for use in both competitions and training. This device responds to the operational need to dampen wave motion and contain turbulence in the pool generated by swimming, ensuring constant hydrodynamics and optimal racing or sports practice conditions. Targeted at aquatic center managers, sports facility managers, and race organizing committees, the divider consists of discs with a diameter of 120 mm (15 per meter) in first-quality polypropylene (PP) with the addition of additives to ensure high resistance to chemical and atmospheric agents. The structure of the 30 m line is assembled on a plastic-coated Ø 6 mm AISI316 stainless steel rope and is integrated with high-density polyethylene PE-HD floating balls (6 per meter). The item is supplied in standard blue, red, and white colors, with the possibility of requesting other colors upon quotation.

## Technical characteristics

- **Type and compliance:** Floating divider suitable for competitions and training, produced in compliance with FINA facility rules
- **Lane length:** 30 m
- **Disc material:** First-quality polypropylene (PP) with the addition of additives for high resistance to chemical and atmospheric agents
- **Disc dimensions and density:** Diameter Ø 120 mm (15 discs per meter)
- **Disc geometry:** Designed to reduce turbulence
- **Assembly support:** Plastic-coated AISI316 stainless steel rope, Ø 6 mm
- **Floats:** PE-HD floating balls (6 per meter)
- **Standard colors:** Blue, red, white
- **Optional colors:** Other colors available on request and upon quotation
- **Stainless steel springs and tensioners** (on request and upon quotation)
