

Flood barrier h1060_01

Aluminum flood barrier (W 60-120 cm x H 40 cm). DIY kit complete with "U" guides and sealing gaskets for quick assembly.

The **flood barrier h1060_01** is a perimeter protection system designed to safeguard residential buildings, garage entrances, basements, and commercial premises from urban flooding. Designed for private or professional users looking for a practical and efficient solution, this barrier solves the problem of water infiltration caused by torrential rains and sudden flooding at its root. The system is based on a sturdy aluminum slat structure, equipped with sealing gaskets and ergonomic grip handles to facilitate handling. Supplied in a practical DIY assembly kit, it allows for quick and autonomous installation: simply prepare the threshold by fixing the two lateral supports to the masonry to obtain a water defense that is always ready for use and easy to insert during weather alerts.

Technical features

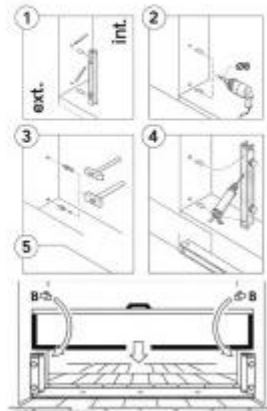

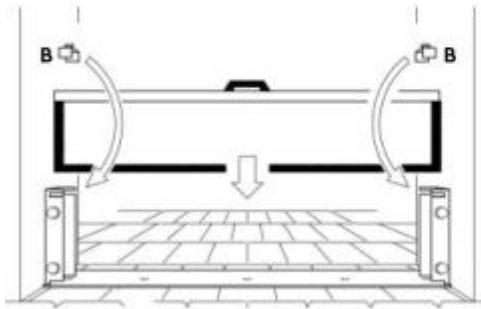

- **Construction material:** Structural aluminum with slat system
- **Length dimensions:** From 60 to 120 cm
- **Barrier height:** 40 cm
- **Sealing system:** Integrated waterproof gaskets to block infiltration
- **Ergonomics:** Equipped with grip handles to facilitate manual positioning
- **Origin and production:** Made in Italy
