

Foldable gymnastics mat with handle h731_62

Foldable mat in 30 kg/m³ density resin, 195x70x5 cm, high-resistance coating, non-slip and fireproof bottom for medical use. This **foldable mat** is designed specifically for **medical gymnastics, postural and rehabilitation activities** in clinical and sports environments. Thanks to the internal **30 kg/m³ density expanded resin** structure, it offers stable support that prevents sinking, ensuring an ergonomic base for the patient. The velcro closure system and integrated handle facilitate handling and storage, making it a versatile tool for physiotherapy practices and multi-functional centers.

Technical features

- Open dimensions: 195 x 70 x 5 cm
- Padding: expanded resin with performance density of 30 kg/m³
- Coating: high-resistance technical fabric, tear-resistant
- Safety: non-slip fabric bottom for maximum grip to the ground
- Hygiene: anti-mold and anti-bacterial surface treatment
- Fire reaction: certified fireproof material
- Maintenance: fully washable surface for frequent sanitization cycles
- Transport: foldable structure with reinforced handle and velcro lock
- Color: technical blue
