

Foldable IV drip stand h44208

Dismountable IV stand in aluminum and plastic, adjustable height 830-1780 mm, equipped with transport bag and non-slip base.

The **dismountable IV stand** is a professional solution designed to combine operational stability and maximum portability. Designed to meet the needs of **home care**, clinics, and outpatient settings, this pole allows for the safe management of infusions in small spaces or in situations of frequent mobility. The modular structure allows for quick disassembly of the support, which can be stored in the **dedicated bag** included in the supply, eliminating the bulk problems typical of fixed stands.
