

Foldable patient transfer system h664_05

Foldable rollbord in polyethylene with nylon cover. Radiolucent and easy to clean. Max capacity: 200 kg.

The patient transfer roller is an essential product for **medical-healthcare facilities** such as clinics, outpatient clinics and hospitals. **The transfer board** is also indispensable for those who must care for bedridden people **with walking difficulties** and who therefore need help moving from one surface to another. **The transfer sheet** features a solid structure resistant up to **200 kg** and is made of polyethylene and nylon. The product is **lightweight and extremely easy to clean**. The **foldable structure** also allows the sheet to be stored and transported with extreme simplicity.

Technical features:

- Material: polyethylene and nylon
- Capacity: 200 kg
- Lightweight and flexible
- Radiolucent
- Easy to clean
- Foldable
- Dimensions: 180 x 50 cm
