

## Foldable physiotherapy parallel bars 3 m h581\_36

Foldable parallel bars for walking exercises. Structure material: painted steel. Handrail length: 3 m.

**Rehabilitation bar with steel handrails** for patient rehabilitation activities to allow them normal and autonomous walking. **Foldable structure**, made of **painted steel** with **height-adjustable steel handrails** through a **telescopic system**. The handwheels prevent loosening and possible settling of the handrails during the person's loading. The **length is 3 m**.

### **Technical features:**

- Handrail length: 3 m
- Handrail height adjustment: 69 - 100 cm
- Handrail width: 60 cm
- Maximum width: 70 cm
- Single handrail capacity: 135 kg
- Material: painted steel
