

Folding blood collection chair h1016_05

Folding hospital chair for blood collection, equipped with 4 wheels (2 with brake and 2 without brake), leg rest, footrest and removable armrests,

The **h1016_05 folding chair** is designed to guarantee **comfort, safety and practicality** during blood collection and examinations in healthcare environments.

Thanks to its **round steel structure** with **epoxy paint coating**, it offers solidity and resistance, while maintaining lightness and maneuverability.

It is equipped with **independent folding backrest and leg rest**, adjustable via a 400N gas piston, which allow the patient to find the most comfortable position. The **padded seat, backrest and leg rest** in **polyurethane foam** and covered in **vinyl** guarantee comfort, hygiene and durability. The vinyl fabric has the following characteristics: **antimicrobial, antibacterial and antifungal protection; antistatic finish; high abrasion resistance; fire-retardant material; resistant to urine and blood.**

The **removable and height-adjustable armrests, with a chrome finish**, facilitate patient access and improve functionality for healthcare operators. The 125 mm **synthetic wheels**, of which **two with brake**, allow for easy mobility and stability during use.

Choose the h1016_05 folding chair for blood collection to guarantee comfort for the patient and practicality for healthcare personnel in every medical context.
