

Folding funeral trolley h687_86

Folding funeral trolley in aluminum and stainless steel. Load capacity: 300 kg, compact (13 cm folded) and produced in Italy for coffin transport.

The **h687_86 folding funeral trolley** is a professional device designed in Italy for the support and transport of coffins, combining maximum robustness and minimum footprint. Made with an **aluminum frame** to contain weight without sacrificing solidity, it integrates joints and handles in **stainless steel** to guarantee long-lasting resistance over time. This support solves the logistical problem of storage and transport on operational vehicles, reducing to only 13 cm in thickness when folded. Thanks to the lubricated nylon and teflon bushings, the opening and closing operations are silent and precise, making it ideal for funeral agencies and cemetery services operating in solemn contexts.

Technical features

- **Open dimensions:** 118 x 55 x 55 cm
- **Folded dimensions:** 73 x 13 x 55 cm (thickness 130 mm)
- **Load capacity:** 300 kg
- **Materials:** Aluminum (frame), Stainless Steel (joints and handles), Nylon and Teflon (bushings)
- **Wheels:** Diameter 12.5 cm (125 mm)
- **Brakes:** 2 wheels equipped with a braking system
- **Width with extended handles:** 1000 mm
- **Available finishes:** Bronze, Silver, Black
- **Production:** Made in Italy
