

Folding telescopic ladder h858_10

Professional 3.2-meter anodized aluminum telescopic ladder, folding and compact, EN 131 certified for maximum operational safety.

This **professional telescopic ladder** is designed for operators who need a versatile, robust, and easily transportable lifting tool. The **anodized aluminum** structure ensures high resistance to wear and atmospheric agents, preventing oxidation and keeping the user's hands clean during use. Thanks to the folding system, the ladder solves storage and transport issues in tight spaces, while offering superior stability thanks to steps with a non-slip surface and an integrated locking mechanism.

Technical features

- **Material:** High-resistance anodized aluminum
- **Configuration:** Telescopic and folding structure
- **Number of steps:** 2 x 5
- **Maximum height:** 3.2 m
- **Closed dimensions:** 81 x 47 x 18 cm
- **Safety:** Special non-slip steps and locking mechanism
- **Regulatory compliance:** Product manufactured according to EN 131 safety standards
