

Folding telescopic ladder h858_12

Professional 5-meter anodized aluminum telescopic ladder, 2x8 steps configuration, EN 131 certified and ultra-compact for transport.

This **professional telescopic ladder** is designed for operators who need to reach high heights without sacrificing portability. Thanks to the **anodized aluminum** structure, the ladder prevents oxidation and ensures superior cleanliness during use, making it ideal for maintenance workers, installers, and construction professionals operating in contexts where storage space is limited. The modular extraction system solves the problem of transporting bulky equipment on small commercial vehicles.

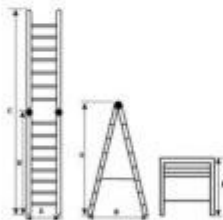

Technical features

- **Material:** High-resistance anodized aluminum
- **Step configuration:** 2 x 8 steps with non-slip surface
- **Maximum extended height:** 5 meters
- **Dimensions in rest position:** 94 x 47 x 19 cm
- **Safety:** Integrated automatic locking mechanism
- **Components:** Aluminum sliding rings for greater durability
- **Compliance:** Produced according to EN 131 European safety standards
