

Folding telescopic ladder h858_14

Professional 3.8-meter anodized aluminum telescopic ladder, space-saving folding structure with ribbed non-slip steps.

This **telescopic ladder** is designed for intensive **professional use**, offering a versatile solution for those who need to reach high heights without the bulk of a traditional ladder. The **anodized aluminum** structure not only guarantees superior structural strength, but also prevents oxidation and keeps the operator's hands clean during handling. Thanks to the assisted closing system and extremely compact dimensions when stored, it effectively solves storage and transport problems in small vehicles.

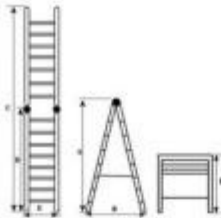

Technical features

- **Material:** High-resistance anodized aluminum
- **Step configuration:** 2 x 6 system
- **Safety:** Integrated locking mechanism for each section
- **Support surfaces:** Special ribbed non-slip steps
- **Components:** Aluminum sliding rings
- **Folded dimensions:** 89 x 46 x 19 cm
- **Maximum extended height:** 3.8 meters
- **Portability:** Folding and compact design
