

Folding transit chair 4 wheels h687_60

Folding transit chair in steel and PVC, weight 9.4 kg and load capacity 180 kg. Equipped with telescopic handles for agile maneuvers in tight spaces and stairs.

The **folding transit chair** is a professional device designed for moving people with reduced mobility in critical operational contexts. Thanks to the frame that combines **lightness and robustness**, with a weight of only 9.4 kg, the tool is easily maneuverable even in the presence of stairs or steep slopes. Patient comfort is guaranteed by a **semi-rigid seat** and a soft backrest, while safety is entrusted to an integrated belt system and a folding footrest.

Technical specifications
