

Folding trapezoid table for schools and offices h872_14

Folding trapezoidal table in steel and MDF with wheels. Modular, space-saving and ideal for circular configurations in schools and offices.

The **folding trapezoid table** is an advanced technical solution designed for setting up dynamic training environments, offices, and educational contexts. Its unique trapezoidal geometry allows for **extreme modularity**, enabling a quick transition from individual workstations to collective circular configurations, optimizing every centimeter of the available surface. The top folding mechanism and the frame designed for nesting facilitate storage operations, making it indispensable in multipurpose rooms where space management is a priority.

Technical specifications

- **Frame:** high-resistance steel with epoxy powder coating.
- **Worktop:** MDF wood with 2 mm PVC protective edge.
- **Color:** white.
- **Operating height:** 75 cm.
- **Mobility:** 4 universal 2.5" wheels, 2 of which are equipped with parking brakes.
- **Modular configuration:** designed for a circular layout with a total diameter of 1800 mm (achievable with 6 modules).
- **Space-saving system:** folding top for easy nesting and reduced footprint.
- **Included accessories:** integrated swivel modesty panel for increased privacy.

**The price is for a single table and not for the complete configuration.*
