

Folding workbench h858_69

Folding workbench in durable laminate, 129x59 cm. Adjustable to 3 heights with a 150 kg load capacity and integrated wheeled transport system.

The **h858_69 folding workbench** is a multifunction workstation designed to combine robustness and mobility in professional and maintenance contexts. The **high-resistance laminate** structure and optimized frame allow for handling significant loads in small spaces, solving the problem of bulky fixed stations in workshops, garages, or temporary worksites.

The worktop integrates precision tools such as a **protractor and an engraved ruler**, facilitating cutting and marking operations without the aid of external tools. Ergonomics is guaranteed by a **three-level height adjustment** system, which allows the station to be configured according to the operator's height or the type of intervention required.

Technical features

- **Worktop dimensions:** 129 x 59 cm
- **Configurable operating heights:** 52 cm, 66 cm and 80 cm
- **Maximum load capacity:** 150 kg
- **Frame material:** Technical laminate and metal components
- **Storage dimensions:** 94 x 48 x 16 cm
- **Handling system:** 4 integrated wheels with traction rope
- **Total weight:** 15 kg
- **Worktop equipment:** Small parts compartments, screwdriver and plier slots

Accessories included: The system comes complete with 2 clamping jaws, 2 fixing blocks, and a dedicated rope for movement in trolley mode.
