

Forklift safety cage h935_01

Forklift man basket. For 2 people. Dimensions: W. 1090 x D. 1200 x h. 2000 mm.

The **2-person forklift work cage** is designed to offer safety and functionality during operations at height. Made with a **sturdy powder-coated square tube structure** in a vibrant **pure orange RAL 2004**, this basket stands out for its solidity and visibility. The **work platform**, wide and **non-slip**, features an **enclosed base tray** that prevents objects from falling, ensuring an organized and safe working environment. Access to the platform is easy via a sliding safety bar, while the **payload of 280 kg** makes the basket suitable for two people, facilitating collaboration during operations. Safety is further enhanced by **two anchoring points for personal protective equipment (PPE)** and a **rear wall equipped with wire mesh**, which provides additional protection against falls. The platform **complies with DGUV 208-31 regulations (new since 2020)** and includes a **tool tray**, ensuring that everything needed is within reach. To prevent the forks from slipping, the work basket features a **safety device via chain**. The product is delivered with the **TÜV GS mark**, certifying its quality and safety.

Technical features:

- Suitable for 2 people
- Powder-coated in pure orange RAL 2004
- Useful surface: 1140 x 950 mm
- Weight: 125 kg
- Payload: 280 kg
- Total permissible weight: 405 kg
- Length with tool box: 1275 mm
- Distance between forks: 610 mm
