

Free-standing safe with backlit keyboard for PC h7663

Hotel safe with digital electronic lock and LCD digital display. For 15" and 17" notebooks. Key lock for emergency opening.

The **h7663 free-standing safe** is a high-level security solution designed for the HoReCa sector, ideal for protecting **large notebooks (15" and 17")**. The product combines innovative design with advanced technology: it is equipped with a **blue LED backlit keyboard** that activates when keys are pressed and an **internal LED light** that facilitates viewing of the contents when the door is opened. Security is guaranteed by a 5 mm thick door and an electronically managed motorized lock. For the hotelier, this model solves management issues thanks to the **audit trail** function (event history) and the double emergency unlocking option, either mechanical or via an optional electronic device.
