

Free-standing safe with digital electronic combination h7655

Free-standing safe with electromagnetic lock. Internal shelf. Available in various sizes. Color: sand.

The **h7655 free-standing hotel safe** represents a benchmark for security in accommodation facilities, combining robust mechanical protection with an advanced digital management system. The 6 mm door, made with **laser cutting**, ensures a millimetric closure and superior resistance against forced entry attempts. This model solves the problem of access management thanks to a **high-reliability electronic device** that allows the guest to set personalized codes, while offering the hotelier total control via the Master code. The internal structure is enriched by a **shelf** to better organize valuables and a protective mat, all finished with a thermosetting powder coating in an elegant sand color.

Technical features

- **Door thickness:** 6 mm with laser cut
- **Body thickness:** 2.5 mm
- **Lock:** Electromagnetic controlled by electronic device
- **Combination:** Programmable guest code from 4 to 10 digits
- **Hotel Management:** Possibility to program a reserved Master code
- **Emergency systems:** Double-bit key lock for manual opening (identical for hotel batch) and contacts on the keypad for external power supply
- **Power supply:** 9 V alkaline battery (not included)
- **Organization:** Internal shelf and mat on the base
- **Fixing:** Anchoring holes on the back (2) and base (2) with expansion bolts included
- **Finish:** Sand-colored powder coating
- **Variants:** Available in two different sizes
