

## Frog spring rider h521\_53

Individual spring rider in the shape of a frog, designed to stimulate movement and imagination in young children in total safety. Dimensions: L. 750 x D. 450 mm.

The **h521\_53 spring rider**, shaped like a cute frog, is ideal for **public playgrounds** and **recreational spaces dedicated to children**. Designed for individual play, it allows the child to **rock independently** using their own strength, thus promoting the development of balance and coordination.

The structure is made of 15 mm **HDPE polyethylene**, a material extremely resistant to atmospheric agents and wear. The **galvanized sheet metal junction plates** and **galvanized steel hardware** ensure robustness and stability over time. All screws are covered by **colored polyamide caps**, to ensure maximum safety during use.

Thanks to its **attractive shape** and **solid structure**, this game is perfect for entertaining children in a safe and fun way. **It is recommended to anchor it 800 mm into the ground.**

Choose the **h521\_53 frog spring rider** to create a safe, resistant, and engaging play area.

### Technical features:

- **Shape:** frog
- **Type:** individual spring rider
- **Dimensions:** L. 750 x D. 450 mm
- **Fall height:** 0.45 m
- **Safety area:** 2750 x 2450 mm
- **Age of use:** +3
- **Structure material:** 15 mm HDPE
- **Junction plates:** galvanized sheet metal
- **Spring:** certified steel 20 x 200 x 400 mm
- **Screws and hardware:** galvanized steel
- **Screw protection:** colored plastic caps
- **Installation:** for public parks
- **Movement:** rocking
- **Certification:** compliant with UNE EN1176 standard

### User benefits:
