

Fruit and vegetable display h757_28

Stable bench with angled legs, ideal for fruit and vegetables with a resistant 35x20 tubular structure. Dimensions: W 150 x D 120 x Rear foot H 90 cm and front foot H 50 cm.

The **H757_28 fruit and vegetable display** is a professional technical bench designed to offer **maximum stability, visibility, and resistance** in the sale and presentation of fruit, vegetables, and flowers. It is particularly suitable for street vendors, local markets, fairs, or temporary setups.

Made with a **35x20 mm reinforced double tubular profile** and **50 mm oval tubes**, this bench guarantees **structural solidity** even during prolonged use and with heavy loads. The **legs with a 98° angle opening** ensure perfect weight balance and **superior stability** even on surfaces that are not perfectly regular.

Assembly is carried out via **bolting**, with **special hinges** that make installation practical and safe. The **special insert profile** further strengthens the structure, distributing loads evenly across the support surface.

The **rounded die-cast aluminum corners** are designed to reduce the risk of injury during daily use, improving safety for both the operator and the customer.

The inclined surface — obtained thanks to the difference in height between the front (50 cm) and rear (90 cm) feet — facilitates a **complete view of the displayed products**, improving the shopping experience and the organization of the display space.

Choose the **H757_28 display**: robustness and visibility for your fruit and vegetables. Request a personalized quote now for bulk purchases.
