

## Fruit display stand h757\_26

Stable bench with angled legs and robust top. Dimensions: W 150 x D 120 x H rear leg 90 cm and H front leg 50 cm.

The **H757\_26 fruit display stand** is designed to meet the needs of street vendors, greengrocers, and flower sellers who require an **inclined, stable, and resistant support surface**, ideal for the tidy and accessible presentation of products.

Made with a **thin 30x18 mm tubular profile** and **50 mm oval tubes**, it offers a perfect balance between **solidity and lightness**. The **98° angled leg opening** is a functional feature that ensures **extraordinary structural stability**, even with heavy loads and on surfaces that are not perfectly flat.

The bench is **assembled using bolts**, with robust components and **special hinges**, which guarantee secure and reliable assembly. The **special insert profile** further strengthens the structure and improves weight distribution.

The **corner components are made of die-cast aluminum and rounded**, to offer **accident-prevention safety** during daily loading, unloading, and handling operations of the bench.

Thanks to the **double height** (90 cm rear, 50 cm front), the bench creates an inclined surface ideal for the clearly visible display of fruit, vegetables, and plants, improving the visual impact and purchasing ergonomics for customers.

Buy the **H757\_26 display stand** now: maximum stability and visibility for your goods. Request a quote for multiple orders!

### Technical features:

- **Structure:** Thin 30x18 mm tubular profile
- **Oval tubes:** 50 mm section
- **Legs:** 98° angled opening
- **Fastening:** Assembled using bolts
- **Hinges:** Special for stable mounting
- **Corners:** Rounded accident-prevention in die-cast aluminum
- **Special profile:** With structural insert
- **Dimensions:** W 150 x D 120 x Rear H 90 cm and Front H 50 cm

### User benefits:

- **Maximum:** product visibility thanks to the inclined surface.
- **Structure:** stable even on irregular surfaces.
- **Safety:** of use with accident-prevention corners.
- **Ease:** of assembly thanks to special hinges.
- **Ideal:** for fruit, vegetables, and flowers.

### FAQ:

1. **Is this bench suitable for displaying fruit and vegetables?**  
Yes, it is specifically designed for the display of fruit, vegetables, and flowers.
2. **Is the surface inclined?**  
Yes, the inclination is guaranteed by the different height of the legs: 90 cm at the back, 50 cm at the front.

3. **Is the bench stable on irregular surfaces?**

Yes, thanks to the legs with a 98° angled opening, it ensures excellent stability.

4. **Is the table equipped with fiberglass?**

No, the table is not equipped with fiberglass.

5. **Are the corners safe?**

Yes, they are rounded and made of accident-prevention die-cast aluminum.

**Mini buying guide:**

If you operate in the fruit and vegetable sector or in the sale of plants and flowers, it is essential to have a bench that ensures **visibility and stability**.

The H757\_26 model was designed to facilitate product display with an **ergonomic inclined surface**, achieved through the height difference between the two sides.

The **angled legs** and **resistant materials** such as aluminum and tubular steel offer **solidity and long durability**, making it ideal for daily and intensive use.

The **simple assembly**, combined with the **safety of the rounded corners**, makes it a professional, practical, and functional product for those who work in direct contact with the public.
