

Fruit display stand h757_27

Slanted stand with fiberglass and angled legs. Dimensions: W 150 x D 120 x H back foot 90 cm and H front foot 50 cm.

The **fruit display stand H757_27** has been designed to specifically meet the needs of street vendors, greengrocers, and nurserymen. Thanks to its slanted and stable structure, it is ideal for the organized and functional display of **fruit, vegetables, and flowers**.

Made with a **thin tubular profile of 30 x 18 mm** and **50 mm oval tubes**, the stand guarantees **strength and lightness**. The surface is covered with **blue heat-bonded fiberglass**, a solution that ensures **high hygiene, ease of cleaning** and resistance to external agents. The model shown in the photos does not include the fiberglass, but **fiberglass** is nonetheless **included in the supply**.

The **legs with a 98° angle opening** are designed to offer **superior stability**, even on uneven ground, making it perfect for use in outdoor markets or fairs. The structure is **assembled using bolts** and features **special hinges** that facilitate assembly and guarantee solidity over time.

The **rounded die-cast aluminum safety corners** are an important safety feature for those who handle goods daily. Furthermore, the stand is reinforced by a **special insert profile** that contributes to a uniform distribution of the load on the support surface.

The slant of the surface (with a height of 90 cm on the back side and 50 cm on the front) improves **the visibility and accessibility of the displayed products**, increasing sales effectiveness.

Order the **H757_27 stand with fiberglass** now or request a personalized quote for multiple supplies! Maximum display performance and safety for your products.
