Galvanized steel dog waste container h33203

Galvanized steel dog waste collection bin, 60 liters, ground fixing, front opening, 36x34x112 cm, CE certified, Italian product.

Specialized container for dog waste collection, designed for public and semi-public spaces such as historic centers, residential areas, condominium gardens, and parks. Made of **galvanized steel**, the bin combines structural durability with recognizable aesthetics thanks to the identifying graphics on the front, making it easy for users to find. The **ground fixing plate** ensures stability and prevents accidental tipping.

The product is designed to facilitate routine maintenance: the **removable cover** allows for quick bag replacement without disassembly or complex interventions.
