Galvanized steel pallet for warehouses h1037_06

Industrial galvanized steel pallet 1000x1200 mm. 5-axis structure, 17.8 kg, 100% fireproof and recyclable, ideal for logistics and secure storage.

The **h1037_06 galvanized steel pallet** represents an advanced solution for industrial logistics and intensive storage. Designed to meet the needs for **maximum robustness** and safety, this support stands out for an optimized weight-to-resistance ratio. Thanks to a specific **patented profiling process** and the absence of solid material, the pallet guarantees superior maneuverability without compromising structural capacity, eliminating the typical issues of wood or plastic pallets in terms of durability and hygiene.

The integral **galvanized steel** construction protects the component from oxidation and corrosion, making it suitable even for use in humid environments or outdoor storage. The technological choice of **riveting** instead of traditional welding gives the structure greater elasticity and solidity, significantly extending its operational life cycle. Completely **fireproof and recyclable**, the H1037_06 model supports companies in achieving high fire safety and environmental sustainability standards.

Technical features

- **Material:** high resistance galvanized steel
- **Dimensions:** 1200 x 1000 mm
- **Configuration:** 5-axis structure
- **Weight:** 17.8 kg
- **Profile:** reduced thicknesses for weight/load optimization
- **Surface treatment:** anti-corrosion galvanized coating
- **Assembly:** rivet system (without welding)
- **Thermal properties:** resistant to thermal shocks and extreme temperatures
- **Maintenance:** washable surface and moisture resistant
- **Sustainability:** 100% recyclable with CO2 emissions reduction
- **Certifications:** 100% fireproof material
